V-ARI

REINVENTING THE WAY YOU USE
RADIO

TRADITIONAL COMMUNICATION MEETS DIGITAL INTELLIGENCE

V-ARI - COMPATIBLE WITH ANY DIGITAL MOTOROLA RADIO

V-ARI is an AI-powered **virtual dispatcher** you control entirely with your voice, over your two-way radio network. This distraction-free radio solution is designed for rugged environments, delivering instant insights, ticketing, and streamlined team communication through simple push-to-talk commands - all while integrating seamlessly into existing systems and workflows without adding complexity.

MEET YOUR VIRTUAL DISPATCHER – V-ARI

Below are just a few of the many features that V-ARI provides to organizations seeking smarter, scalable solutions leveraging their existing two-way radio systems.

Multilingual Support

Speak to V-ARI in your own language - it responds instantly, keeping conversations natural and smooth

Ticketing Capabilities

Create and manage tickets using voice commands. V-ARI can integrate with your existing ticketing system to provide real-time updates without interrupting operations.

Email/SMS Notifications

Allows users to send emails and SMS via voice commands from their radios. This supports multi-channel communication without breaking operational focus.

Ask AI Anything

Leverage internal resources or public resources to access information at your fingertips. Get internal inventory information or maintenance specs on commercial equipment, plus a whole lot more.

Triggered Actions

Leverage I/O systems and have V-ARI open a gate, access sensor information, start a generator or access another electronic system.

Efficient Task Management

V-ARI streamlines task assignment and tracking in real-time. It reduces manual steps and keeps operations flowing smoothly across teams.

BUILT ON A LEGACY, ENHANCED BY AI

- **Eliminate the Technology Gap** – simple to use, integrates with existing radios – without changing how teams work.
- **Accessible for All Skill Levels** – ideal for workers with any level of technology experience, simply by just using their voice.
- **Reduce IT Burden** – no devices to update, monitor, or accounts to manage. V-ARI is delivered over voice not data to the users.
- **Consolidate Devices** – minimize the need for multiple devices.
- **Keep Moving, Maintain Efficiency** – use voice while being continually on the move, maximizing efficiency in your workforce.
- **Extend Your Network** – use your voice network to connect where LTE and conventional networks can't.
